July 1874.

R. VALPY.

DEPARTMENT DEPARTMENT

## TO THE RIGHT HONOURABLE THE LORDS OF THE COMMITTEE OF PRIVY COUNCIL FOR TRADE.

---

My Lords,

I have the honour to submit to your Lordships the first number of a Statistical Abstract relating to the principal countries of Europe, and to the United States of America, based upon the plan of the Statistical Abstracts for the United Kingdom and the British Possessions.

In this Abstract the tables have been prepared to present a comparison for a period of about 12 years, commencing with the year 1860, and ending with 1871 or 1872, the latest date for which the required particulars could be obtained.

The preparation of comparative tables of foreign statistics for a period of from 10 to 12 years has been found a difficult work, owing to the changes that occur from time to time in the system of making up the various public accounts in almost all countries.

In order to secure as far as possible in the tables for each country, corresponding results year by year, the assistance of the chief officers of the several foreign statistical departments was invited, and was most cordially and kindly rendered. These gentlemen were supplied with printed proofs of the tables (compiled so far as they could be in this department from the foreign official returns), and many corrections and additions were received from such official sources. The trouble bestowed in several and the readiness in all instances to promote the publication of correct statistics for each country may be taken as proofs of the general willingness of statistical authorities to further the useful object of publishing statistics suitable for international comparison and reference.

Unfortunately the statistics of many countries cannot now be compared, owing to differences in dates and in the classification of details; but the making known the want of greater assimilation in the statistical tables of different countries, is a necessary step towards obtaining so important an element in comparative statistics.

L. of E. Ex 5V. 1860-60, 1865-98 nos 13, 23, 26 14 Mr 11 A.G.

The first table of this Abstract, in which the total area and total population are stated, affords an instance of the variations in the dates of some branches of national statistics. It will be observed that the Census of the population is generally taken decennially, but not in the same year in all countries.

The tables of the total Revenue and Expenditure exhibit the variations that exist in the modes of rendering the financial accounts of the various countries. Budget statements or estimated receipts and expenditure are given for some countries, and the actual amounts paid into and out of the public Treasury in others. There is not a uniformity of practice in giving the gross or net amounts of the public income and expenditure. The cost of collecting the revenue is treated as a branch of expenditure in most countries, and the gross income and expenditure is then given, but there are exceptions to this system, and then only net amounts are published.

In statements of the total revenue raised and expenditure incurred in each country, the amounts received and disbursed both by the State and local or departmental authorities ought to be included. Both aggregate and separate totals of the results of the State and Local finances ought to be given in national statistics. But the services undertaken by the State and Local authorities are so differently apportioned in various countries, that in this respect considerable difficulties occur in international comparisons of Revenue and Expenditure.

The construction of railways has caused differences to occur not only in the sources of Revenue and Expenditure, but in the amount of the Public Debt of different countries. Where the State undertakes wholly or partially to provide capital for railway purposes, receipts and payments connected with such services appear in the public accounts, and must be taken into consideration in making international comparisons of financial statistics.

The several points of difference in the official statistics of the various countries are, as far as practicable, made apparent in the several Tables of this Abstract.

In the Shipping and Trade Statistics fewer differences have to be noticed. As regards returns of Imports and Exports although most countries distinguish the General and Special Commerce, (the latter term means generally "Imports for Home Consumption," and "Exports of Domestic Produce," including "Duty-paid Foreign Imports,") yet it appears that there is not

in all countries exactly the same classification for goods, nor quite the same distinction for the separate kinds of trade.

Goods intended for transit only, are not so completely separated from goods imported for home consumption in some countries as in others. In the case of some articles upon which the Import duties are low, merchants pay such duties in preference to paying and reclaiming the deposit required by the transit regulations; and, in such cases, goods are entered in the official returns as imports for home consumption, instead of imports for transit. The classification of "Domestic Produce" in the case of Exports, is not always restricted to articles actually produced in a country itself; colonial produce in some instances being also registered as home produce.

The Statistical Department will endeavour to give additional information in future numbers of this Abstract, intended to be issued annually, but the scope of an Abstract for such a series of years must necessarily be rather limited. More detailed Statistics, but for periods of three years only, are given in the volumes of Statistical Tables relating to Foreign Countries, also prepared and issued by this Department.

I have the honour to be,
My Lords,
Your Lordships' most obedient Servant,
R. VALPY.

Statistical and Commercial Department,
Board of Trade, 1, Whitehall,
December 1876.

## TO THE RIGHT HONOURABLE THE LORDS OF THE COMMITTEE OF PRIVY COUNCIL FOR TRADE.

---

My Lords,

I have the honour to submit the third volume of the Statistical Abstract for Foreign Countries, bringing down the figures, as far as possible, to the year 1875. In doing so, I have to express my obligations to the Statistical Departments of the various Foreign Countries for assistance they have given in supplying and correcting the greater portion of the figures.

As in former issues of this publication, the greatest attention has been given to the Trade Statistics of Foreign Countries. The information as to the Shipping, Imports and Exports, and Countries traded with, is now believed to be very complete as to almost all the European countries and the United States. The comparative tables of Debt and Revenue and Expenditure, showing in one view these particulars as to a number of countries, have for the present been omitted, as it is found that the divisions of the more important states are so dissimilar, and the terms "Debt," "Revenue," and "Expenditure" are employed in the financial language of each country to mean such different things, that a comparison of several countries in one table is likely to be most misleading. The attempt to make the comparison more accurate would render it necessary to give totals and sums differing from those stated in the accounts of each country, which would be inconvenient for reference. To do the work properly, if it were reasonably possible at all, would require an elaborate study, for which there has been no opportunity. The Revenue and Expenditure of several principal countries have, however, been stated separately and with some detail, without an attempt at inter-comparison.

Various other tables have been added, principally relating to the industrial production of various countries. It is hoped to extend these a little in future issues, so as to make the abstract more comprehensive. It would have been desirable in such a publication to add some tables giving more detail than is now attempted as to the population, and also giving the more important particulars as to marriage, birth, and death rates in foreign countries; but details of this kind will be found in the

Annual Reports of the Registrar General, to which reference may here be made.

The information from extra-European Countries remains unfortunately most incomplete, owing in great measure to the difficulty of obtaining trustworthy official information for those countries, for a series of years.

I have the honour to be,
My Lords,
Your Lordships' most obedient Servant,
R. GIFFEN.
